GENERAL INDEX

A

Abramsky, Mordhay See Avron, Mordhay, 100

Abscission, factors influencing, 626

Absorption and mobility of foliar applied nutrients, 428

Absorption and translocation of 2,4-dichlorophenoxyacetic acid and p^{32} by leaves, 225

Absorption of foliar applied phosphorus, factors affecting, 463

Absorption of inorganic ions by root cells, comments on, 491

Absorption of potassium and bromide by barley roots, effect of pH and temperature on, 658

Absorption of visible light in green plants, effects of oxygen and red light upon, 536

Accumulation of mineral elements in tobacco plants, effect of 2,4-D on, 243

Action spectra of photmorphogenic induction and its photoinactivation, 453

Activity of nitrate reductase in cauliflower plants grown with different nitrogen sources and molybdenum levels in sand culture, some factors affecting, 280

Aldrich, F. D. A paper chromatographic method for the detection of 3-amino-1,2,4-triazole in plant tissues, 153

Alga, *Porphyra perforata,* cell space and apparent free space in, 63

Allen, Paul J. Properties of a volatile fraction from uredospores of *Puccinia graminis* var. *tritici* affecting their germination and development. I. Biological activity, 385

Allomyces macrogynus, respiration of, 291

Altering the pigments produced by tyrosinase and orthohydroxyphenols with a meta-hydroxyphenol, 4-chlororesorcinol, 240

American Society of Plant Physiologists, annual meeting, 67

American Society of Plant Physiologists, appointments, 155

American Society of Plant Physiologists, northeastern section, news, 377

American Society of Plant Physiologists, southern section, news, 249

Amino acids, ornithine cycle, in some higher plants, 471

Amino acids, relation of optical form to the utilization of. I. Utilization of stereoisomeric forms of glutamic acid by carrot root disks, 360

Amino acids, relation of optical form to the utilization of. II. Utilization of stereoisomeric varieties of aspartic acid and asparagine by carrot root disks, 639

3-Amino-1, 2, 4-triazole, catalase and chlorophyll depression by, 674

3-Amino-1,2,4-triazole in plant tissues, a paper chromatographic method for the detection of, 153

Ammonia, conjugation with 3-IAA as process in metabolism of carboxylic acids, 566

Analysis of factors determining yield in crop plants. I. Varietal differences in yield of grain and straw of wheat as influenced by photoperiodic treatments, 157

Analysis of factors determining yield in crop plants. II. The influence of photoperiodic treatments on characters determining yield in wheat with special reference to the temperature of the ripening period, 163

Analysis of translocation in the phloem of the bean plant using Tho, P^{32} and C^{14}, 608

Andreae, W. A. See Good, Norman E., 561

Andreae, W. A. Studies on 3-indoleacetic acid metabolism. IV. Conjugation with aspartic acid and ammonia as processes in the metabolism of carboxylic acids, 566

Anthocyanin formation in turnip and red cabbage seedlings, photocontrol of, 393

Apple leaves, detached, studies on the formation of ascorbic acid in, 326

Appleman, David See Pyfrom, H. T., 674

Apricot flower buds, rest period of, 75

Arachiotus trisporus, plant growth inhibitors produced by, 56

Aroid spadix, participation of cytochromes in the respiration of, 186

Ascorbic acid, effects on the respiration of barley roots, 23

Ascorbic acid in detached apple leaves, studies on the formation of, 326

Ascospores, Neurospora, function of surface binding sites, 586

Asparagine, utilization of stereoisomeric varieties by carrot root disks, 639

Aspartic acid, conjugation with 3-IAA as process in metabolism of carboxylic acids, 566

Aspartic acid, utilization of stereoisomeric varieties by carrot root disks, 639

Aspects of phosphorus metabolism in the cotton plant, 106

Asselbergs, E. A. M. Studies on the formation of ascorbic acid in detached apple leaves, 326

Auxin, mechanical properties of the Avena coleoptile as related to, 207

Auxin, methyl esterification of cell wall constituents under the influence of, 216

Avena coleoptile, mechanical properties of, as related to auxin and to ionic interactions, 207

Avena coleoptile sections, effect of galactose on growth and metabolism of, 212

Avena coleoptiles, growth stimulation of, 192

Avocado fruit, metabolic processes in cytoplasmic particles of. III. The operation of the tricarboxylic acid cycle, 100

Avocado fruit, metabolic process in cytoplasmic particles of. IV. Ripening and the supernatant fraction, 662

Avron, Mordhay Metabolic processes in cytoplasmic particles of the avocado fruit. III'. The operation of the tricarboxylic acid cycle, 100

Axelrod, Bernard See Richardson, Keith E., 334

B

Ball, Charles D. See Rebstock, Theodore L., 19

Ball, Charles D. See Weller, Lowell E., 146

BANDURSKI, ROBERT S. Rubber biosynthesis in latex of *Hevea brasiliensis*, 643
Barley leaves, a comparison of the light dependent metabolism of carbon monoxide, formaldehyde, formate and carbon dioxide by, 321
Barley roots, effects of ascorbic acid and metal-complexing agents on the respiration of, 23
Barley roots, effect of pH and temperature on the absorption of potassium and bromide by, 658
BARRIER, GEORGE E. Absorption and translocation of 2,4-dichlorophenoxyacetic acid and P^{32} by leaves, 225
BASS, SAMUEL T. See WILDON, CARRICK E., 243
Bean plant, an analysis of translocation in the phloem of, 608
Bean plants, effect of gibberallic acid on enzyme activity and oxygen uptake in, 371
Bean seed extracts, growth- and enzyme-inhibiting properties of, 151
BECK, S. D. See LOOMIS, R. S., 379
BERNER, RICHARD A. See WEBSTER, GEORGE C., 60
BERNLOHR, ROBERT See MARKS, JOY D., 259
BIALE, JACOB B. See AVRON, MORDHAY, 100
BIALE, JACOB B. See ROMANI, ROGER J., 662
Bicarbonate, uptake by roots, 513
BIDDULPH, O. An analysis of translocation in the phloem of the bean plant using Tho, p^{32} and C^{14}, 608
BIDDULPH, ORLIN See KOONTZ, HAROLD, 463
BIGGS, R. H. Factors influencing abscission, 626
Biochemical changes during germination of the tung seed, 668
Biological activity of a volatile fraction from uredospores of *Puccinia graminis* var. *tritici* affecting their germination and development, 385
Biological material, an interference-filter monochromator system for the irradiation of, 355
Biuret on protein synthesis, effect of, 60
BLINKS, L. R. See EPPLEY, RICHARD W., 61
BÖHNING, R. H. See BURNSIDE, CHRISTEL A., 61
BONNER, BRUCE A. Respiration of the mycelia and mitochondria of the filamentous watermold, *Allomyces macrogynus*, 291
BONNER, JAMES See LOCKHART JAMES A., 492
BONNER, JAMES See ORDIN, LAWRENCE, 212, 216
BONNER, JAMES See TAGAWA, TAKASHI, 207
Book review. The Chemistry and Mode of Action of Plant Growth Substances, R. L. Wain and F. Wightman, 155
Book review. Currents in Biochemical Research, David E. Green, 69
Book review. Plants in Action, L. Machlis and J. G. Torrey, 70
BORMANN, F. H. Moisture transfer between plants through intertwined root systems, 48
Boron, influence on starch phosphorylase and its significance in translocation of sugars in plants, 364
Boron nutrition, relationship to radiosensitivity of sunflower plants, 648
Boron, substitution of complexing substances for, 308
BÖVENTER-HEIDENHAIN, B. VON See SUSSMAN, ALFRED S., 586
BRITTINGHAM, W. H. See DANIELSON, L. L., 142
Bromide, effect of pH and temperature on absorption of, 658
BROWN, DILLON S. The rest period of apricot flower buds as described by a regression of time of bloom on temperature, 75
BROYER, T. C. See WOOLLEY, J. T., 148
Bryophyllum calycinum cultured in darkness, the formation of starch and the behavior of isocitric acid in excised leaves of, 220
BUKOVAC, M. J. Absorption and mobility of foliar applied nutrients, 428
BUKOVAC, M. J. See WELLER, L. E., 371
BUKOVAC, M. J. See WITTWER, S. H., 39
BURNSIDE, CHRISTEL A. The effect of prolonged shading on the light saturation curves of apparent photosynthesis in sun plants, 61
Bush bean, effects of atmospheric fluoride on the respiration rate of, 121
BUTTS, JOSEPH S. See FANG, S. C., 253

C

Cabbage, oxidative phosphorylation by subcellular particles from, 374
Calcium, effect on potassium accumulation in corn and soybean roots, 312
Calcium deficiency in cotton, carbohydrate distribution as affected by, 113
CALHOUN, BARBARA See DUGGER, W. M., JR., 364
CANDELA, M. I. Molybdenum as a plant nutrient. X. Some factors affecting the activity of nitrate reductase in cauliflower plants grown with different nitrogen sources and molybdenum levels in sand culture, 280
Capsicum annuum L., hydrogen transport and oxidative phosphorylation by particulates from developing fruits of, 424
Capsicum annuum L., respiration and oxidative activity of particulate fractions from developing fruits of, 418
Carbohydrate distribution as affected by calcium deficiency in cotton, 113
Carbon dioxide, dark fixation by succulent leaves, 197
Carbon dioxide, light dependent metabolism of, by barley leaves, 321
Carbon dioxide, uptake by roots, 513
Carbon dioxide fixation in leaves of long, and short-day treated *Kalanchoë blossfeldiana*, products of, 201
Carbon dioxide fixation into oxalacetate in higher plants, 591
Carbon monoxide, light dependent metabolism of, by barley leaves, 321
Carbonate-fixation in *Chlorella pyrenoidosa*, effects of inhibitors upon, 7
Carboxylic acid, conjugation of 3-IAA with aspartic acid and ammonia as processes in metabolism of, 566
CARLSON, ROBERT M. See JACOBSON, LOUIS, 658
Carrot root disks, utilization of stereoisomeric forms of glutamic acid by, 360
Carrot root disks, utilization of stereoisomeric varieties of aspartic acid and asparagine by, 639

Catabolism, glucose, effect of 2,4-D on pathways of, 136
Catalase and chlorophyll depression by 3-amino-1,2,4-triazole, 674
Cauliflower buds, electron transport and cytochromes of sub-cellular particles from, 619
Cauliflower plants grown with different nitrogen sources and molybdenum levels in sand culture, some factors affecting the activity of nitrate reductase in, 280
Cell maturity, the kinetics of potassium accumulation by corn roots as a function of, 497
Cell sap concentration, role in frost hardiness, 237
Cell space and apparent free space in the red alga, *Porphyra perforata*, 63
Cell wall constituents, methyl esterification of, under the influence of auxin, 216
CHANCE, BRITTON Effects of oxygen and red light upon the absorption of visible light in green plants, 536
CHANCE, BRITTON Oxygen and light induced oxidation of cytochrome, flavoprotein and pyridine nucleotide in a Chlamydomonas mutant, 548
Changes in the inositol content during germination and growth of some higher plants, 334
CHASTAIN, JAMES A. See JACOBSON, LOUIS, 658
Chemical properties of a volatile fraction from uredospores of *Puccinia graminis* var. *tritici* affecting their germination and development, 389
Chemical study of host plant resistance to the European corn borer, 379
Chemistry and Mode of Action of Plant Growth Substances, R. L. Wain and F. Wightman, 155
CHINOY, J. J. See NANDA, K. K., 157, 163
Chlamydomonas mutant, oxygen and light induced oxidations of cytochrome, flavoprotein, and pyridine nucleotide in, 548
Chlorella, role of pH in permeability to 2,4-D, 503
Chlorella pyrenoidosa, effects of inhibitors upon growth and carbonate-fixation in, 7
Chlorophyll depression by 3-amino-1,2,4-triazole, 674
Chloroplasts, red kidney bean, the Hill reaction of, 435
Chromatographic method for the detection of 3-amino-1, 2,4-triazole in plant tissues, 153
Citrus seedlings, studies on the growth of, 11
CLAYBROOK, J. RUSSELL See SKINNER, CHARLES G., 117
CLELAND, ROBERT See ORDIN, LAWRENCE, 216
Cobalt-60, comparative absorption by upper and lower epidermis, 141
Coleus, sedoheptulose in, 269
Comments on the absorption of inorganic ions by root cells, 491
Comparative absorption of cobalt-60 by upper and lower epidermis of leaves, 141
Comparison of the light dependent metabolism of carbon monoxide by barley leaves with that of formaldehyde, formate and carbon dioxide, 321
Complexing substances, substitution for boron in plant growth, 308
CONN, ERIC E. See STANLEY, ROBERT G., 412
Conversion of tryptophan-2-C^{14} to indoleacetic acid by watermelon tissue slices, 263
Corn roots, effect of calcium on potassium accumulation in, 312
Corn roots, kinetics of potassium accumulation by, 497
CORY, R. See BIDDULPH, O., 608
Cotton, carbohydrate distribution as affected by calcium deficiency in, 113
Cotton plant, mineral nutrition of, 169
Cotton plant, phosphorus metabolism in, 106
CRAIG, JAMES C., JR. See LINDER, PAUL J., 572
CRANE, FREDERICK L. Electron transport and cytochromes of sub-cellular particles from cauliflower buds, 619
Crucifers, growth responses to IAA and IAN, 632
Currents in Biochemical Research, David E. Green, review of, 69
CURTIS, ROY W. Translocatable plant growth inhibitors produced by *Penicillium thomii* and *Arachniotus trisporus*, 56
Cytochrome, oxygen and light induced oxidation of, 548
Cytochromes in the respiration of the aroid spadix, 186
Cytochromes of sub-cellular particles from cauliflower buds, 619
Cytoplasmic particles of the avocado fruit, metabolic processes in. III. The operation of the tricarboxylic acid cycle, 100
Cytoplasmic particles of the avocado fruit, metabolic processes in. IV. Ripening and the supernatant fraction, 662
